0:3 Introduction

South Sweden Flight Academy AB is an EASA Approved Training Organization, with its office situated at Ålabodsvägen 79, 26162 Glumslöv, Sweden. Training, briefing and instructor facilities are located at Malmö Airport Hangarvägen 4, Malmö-Sturup.

This manual complies with all EASA regulations.

Instructions laid down in this manual shall be followed by all personnel in their duties within the school.

Nothing said in this manual should prevent any crew member to deviate from these regulations in case of necessities commanded by emergencies or abnormalities. Should such a deviation occur, the Pilot In Command shall without delay inform the person responsible for Safety Management within the organization.

0:4 Revision

Paragraph	Page	Change
0:3	4	Change of visiting address to Hangarvägen 4
A:9(a)	19	Removed Int Prog Tests every 10hrs / Replaced with 2 Phase tests
B:3	29	Removed Int Prog Tests every 10hrs / Replaced with 2 Phase tests
B:5	31	Removed ref to intermediate progress reports
B:7	33	Removed ref to intermediate progress reports
A:11	24	Clarified application of test criteria

PART A – THE TRAINING PLAN

A:1 The Aim of the course PPL(A)

The aim of this course is to train pilots to receive the theoretical and practical knowledge to act as PIC on single engine airplanes engaged in non-commercial operations.

A:2 Pre-Entry Requirements – PPL(A)

(i). Minimum age, educational requirements (including language), medical certificate must be obtained before solo flying is permitted.

An applicant for PPL shall be at least 17 years age.

(ii). Any individual Member State Requirement

Not applicable

(iii). Required Knowledge of Mathematics, Physics and English

Before being admitted to the course the applicant must have a sufficient level of knowledge of Mathematics, Physics and English to facilitate an understanding of the content of the course. A passing grade in the subjects on High School level shall suffice. In case the student does not possess such a grade, the school shall administer a test to satisfy itself of the level of knowledge.

(iv). Conditions

Not applicable.

(v). Exception

None.

(vi). Training Course

Applicants for PPL(A) shall complete a training course. The course shall include theoretical knowledge and flight instruction as of this manual.

(vii). Theoretical knowledge examination

Applicants shall demonstrate a level of theoretical knowledge, appropriate to the privileges granted, through examinations in the following subjects:

Air law,	—
Human performance,	—
Meteorology,	—
Communications,	—
Principles of flight,	—
Operational procedures,	—
Flight performance and planning,	—
Aircraft general knowledge, and	—
Navigation.	—

(viii) Privileges

(a) The privileges of the holder of a PPL(A) are to act without remuneration as PIC or co-pilot on airplanes or TMGs engaged in non-commercial operations.

A:3 Credits and previous experience

(a) Applicants for a PPL(A) shall have completed at least 45 hours of flight instruction in airplanes or TMGs, 5 of which may have been completed in an FSTD, including at least:

- (1) 25 hours of dual flight instruction; and
- (2) 10 hours of supervised solo flight time, including at least 5 hours of solo cross-country flight time with at least 1 cross-country flight of at least 270 km (150 NM), during which full stop landings at 2 aerodromes different from the aerodrome of departure shall be made.

(b) Specific requirements for applicants holding an LAPL(A). Applicants for a PPL(A) holding an LAPL(A) shall have completed at least 15 hours of flight time on airplanes after the issue of the LAPL(A), of which at least 10 shall be flight instruction completed in a training course at an ATO. This training course shall include at least 4 hours of supervised solo flight time, including at least 2 hours of solo cross-country flight time with at least 1 cross-country flight of at least 270 km (150 NM), during which full stop landings at 2 aerodromes different from the aerodrome of departure shall be made.

(c) Specific requirements for applicants holding an LAPL(S) with a TMG extension. Applicants for a PPL(A) holding an LAPL(S) with a TMG extension shall have completed:

- (1) At least 24 hours of flight time on TMG after the endorsement of the TMG extension; and
- (2) 15 hours of flight instruction in airplanes in a training course at a DTO or at an ATO, including at least the requirements of (a)(2).

(d) Crediting: Applicants holding a pilot license for another category of aircraft, with the exception of balloons, shall be credited with 10 % of their total flight time as PIC on such aircraft up to a maximum of 10 hours. The amount of credit given shall in any case not include the requirements in (a)(2).

A:4 Training Syllabi

Instruction shall follow syllabus as far as practical.

Syllabus is based on a minimum time and lessons required. The HT or designee may extend the time and/or number of lessons required to reach proficiency.

(i) Practical Flying Instruction:

All in accordance with appendix A1 of this manual.

(a) Applicants for a PPL(A) at SSFA shall have completed at least 45 hours of flight instruction in airplanes, 5 of which may have been completed in an FSTD, including at least:

(1) 35 hours of dual flight instruction; and

(2) 10 hours of supervised solo flight time, including at least 5 hours of solo cross-country flight time with at least 1 cross-country flight of at least 270 km (150 NM), during which full stop landings at 2 aerodromes different from the aerodrome of departure shall be made.

The student shall have passed all flight lessons, passed all the end of phase progress checks including the final check-ride to successfully complete this training course.

(ii) FSTD:

All in accordance with appendix A1 of this manual.
5 hours may be completed in an FSTD.

(iii) Theoretical Knowledge Instruction:

All in accordance with appendix B1 of this manual.

The theoretical course is 100 hours of instructor led lessons.

Student shall have adequate theoretical training in the systems, handling, performance, normal procedures, and emergency procedures of the aircraft used in training. This training is offered through aircraft specific technical courses and is a natural part of briefing before and after a flying lesson.

A:5 The Time scale and scale in weeks for syllabi

It is expected that the student completes the course within one year.
This course will, as far as practical, integrate both the theory and the practical flying.
Deviations from above schedule is at the discretion of HT or designee.

All the theoretical examinations (CAA exams) shall be completed within eighteen months after the applicant first attempted a CAA examination.

Minimum no of required hours:

Applicants for a PPL(A) shall have completed at least 45 hours of flight instruction.
The minimum required of theoretical instruction is 100 hours.

Theory lessons that shall be covered in a suitable and practicable order are as follows:

010 Air Law	.1
021 Aircraft General Knowledge	.2
022 Aircraft General Knowledge Instruments	.3
031 Mass and Balance	.4
032 Performance	.5
033 Flight Planning	.6
040 Human Performance and Limitations	.7
050 Meteorology	.8
061 General Navigation	.9
062 Radio Navigation	.10
070 Operational Procedures	.11
080 Principals of Flight	.12
090 Communication	.13

Theoretical lessons are to be given during one or two days per week as far as practical and may be subjected to changes.

Example weekly program (subject order as practical):

Week 1-3	Week 4-6	Week 7-9	Week 10-12	Week 13-15	Week 16-17
ALW 1	POF 2	M&B	HPL	GNAV	COM
ALW 2	AGK 1	PER	MET 1	RNAV	Reserve
POF 1	AGK 2	FPL	MET 2	OPP	Reserve

Example weekly schedule practical training (as far as is practicable)

Week 1-6	Week 6-12	Week 12-18	Week 18-24	Week 24-30	Week 30-36
----------	-----------	------------	------------	------------	------------

Lessons 1-8	Lessons 8-16	Lessons 16-26	Lessons 26-36	Lessons 36-42	Reserve
-------------	--------------	---------------	---------------	---------------	---------

A:6 Training program

Instruction shall generally follow syllabus.

Syllabus is based on a minimum of time and lessons required. The instructor may extend the time and/or number of lessons required to reach proficiency.

A student shall never be in doubt of his progress.

(i) The general arrangements of daily and weekly programs for flying, theoretical knowledge training and training in FSTD;

The course, as far as practical, integrate both the theory and the practical flying. Flight lessons and FNPT training is scheduled in a continuous basis throughout the program.

Theoretical lessons are to be given during one or two days during scheduled weekends as far as practical.

(ii) Bad weather constraints;

See OM A:20

(iii) Program constraints in terms of maximum student training times,

See OM A:16

(iv) Restrictions in respect of duty periods for students;

See OM A:16

(v) Duration of dual and solo flights at various stages;

See Appendix A1

(vi) Maximum flying hours in any day or night;

See OM A:16

(vii) Maximum number of training flights in any day or night;

Maximum 2 training flights/day/student recommended.

(viii) Minimum rest period between duty periods.

See OM A:18

A:7 Training records

Student Records shall include:

Student Folder Content (OM A:12:1)	(a)
Student General (OM A:12:2)	(b)
License information (copy)	(c)
Student Course Overview (OM A:12:3)	(d)
Student Course Details (OM A:12:4)	(e)
Student Intermediate Course Progress (OM A:12:5)	(f)
Training Record (Appendix A1)	(g)
Other pertinent documents	(h)

(i) Rules for security of records and documents;

All records shall be retained for a period of three years.

All records shall be entered and verified by the instructor.

All records shall be kept in the student folder, inaccessible by non-instructors without the presence of an instructor.

After completed course student records will be digitized and stored encrypted on two digital locations and paper copy will be destroyed.

A student may obtain a copy of his own records upon request.

(ii) Attendance records:

An attendance record of the theory lessons shall be noted by the applicable instructor.

The attendance is recorded by the instructor in Flightlogger attendance records.

Practical flying lessons are to be recorded in Flightlogger flight records.

(iii) The form of training records to be kept:

The training Record for PPL is Practical Flying Exercises in appendix A1 and records of the theory attendance is stored in Flightlogger as per appendix B2.

(iv) Persons responsible for checking records and students' log books:

Instructors are responsible for checking student records.

Student pilot is responsible for their own log book.

(v) The nature and frequency of record checks:

Prior to theory or flight lessons, it's the responsibility of the instructor to check student records.

Before performing a progress check the examining instructor shall crosscheck students training records for completeness. HT/CFI/CTKI or designee shall crosscheck student records prior to examination.

(vi) Standardization of entries in training records:

Personnel is standardized during initial training and refresher training on entries in training records. Standardization training is also part of the instructor meetings.

(vii) Rules concerning log book entries.

Personal logbook is the responsibility of the individual.

Aircraft logbook shall be signed by the instructor.

A:8 Safety training

See om A:21

It is the responsibility of all personnel and all students, at all times, to promote safety in all its aspects.

It is the responsibility of HT that the safety routines are developed.

All students shall receive safety instructions of the location and use of all safety equipment installed in any for the student new aircraft used in the training, before the commencement of any flight.

Safety drills shall be part of normal training. Apart from the normal exercises in the use of emergency checklists, a student shall at least once during the course have drilled aborted take-off with subsequent evacuation of the aircraft.

All personnel and all students are expressly authorized to deviate from any and all regulation or instructions in case safety is jeopardized.

Safety training shall be recorded in the document STUDENT COURSE OVERVIEW (ref: OM A:12:3)

(i) Individual responsibilities;

It is the responsibility of all personnel and all students, at all times, to promote safety in all its aspects.

It is the responsibility of HT that the safety routines are developed.

(ii) Essential exercises;

All students shall receive safety instructions of the location and use of all safety equipment installed in any for the student new aircraft used in the training, before the commencement of any flight.

Safety drills shall be part of normal training. Apart from the normal exercises in the use of emergency checklists, a student shall at least once during the course have drilled aborted take-off with subsequent evacuation of the aircraft.

(iii) Emergency drills (frequency);

Specific safety training shall be done once and reviewed before every flight.

(iv) Dual checks (frequency at various stages);

Safety drills shall be checked at least during every end of phase progress check.

(v) Requirements before first solo, navigation flight;

Before first solo flight student must have current and valid documents.

Student must have valid ID, license and a valid medical license. The student must have a valid language proficiency check, R/T certificate and have received a solo permit. Student must also have attended the specific aircraft technical course and

passed a written technical exam. The required Phase 1 flight lessons, including “Phase 1 Progress Test, must be completed and passed before first solo flight.

First long solo navigation flight (lesson 35) also requires the student to have attended a practical flight planning course, and completed all required flight lessons in Phase 2 including “Phase 2 Progress Test).

A:9 Assessment, tests and examinations

(i) Flying:

(A) Progress checks:

A progress check is done twice per course as far as is practical. The progress check is to be recorded in course documentation in Flightlogger under “Progress test Phase 1” and “Progress test Phase 2” and completed by HT, CFI or designee. The progress check is to evaluate the overall performance of the student.

(B) Skill tests:

Before presenting the student for a skill test, the school shall perform a Practical Flying Test (Check ride) so to satisfy itself of the competence of the student.

The Practical Flying Test (check ride) may not be done before the applicant has successfully passed the theoretical examinations and completed all the lessons of the flight training.

An applicant for the skill test shall have received flight instruction on the same class of aircraft to be used for the skill test.

The flying test (check ride) may be part of last session in the course.

The check ride shall be divided into different sections, representing all the different phases of flight appropriate to the category of aircraft flown.

After passing the check ride, the student will be eligible for a skill test.

Applicants for a PPL shall demonstrate through the completion of a check ride the ability to perform, as PIC on a single engine piston, the relevant procedures and maneuvers with competency appropriate to the privileges granted.

Pass marks:

(1) Failure in any item of a section will cause the applicant to fail the entire section.

(2) Failure in more than 1 section will cause the applicant to fail the entire test. If the applicant fails only 1 section, he/she shall at least repeat only that section.

(3) When the check ride needs to be repeated in accordance with (2), failure in any section, including those that have been passed on a previous attempt, will cause the applicant to fail the entire test.

(4) Failure to achieve a pass in all sections of the test in 2 attempts will require further training.

(ii) Theoretical knowledge:

(A) Progress tests;

During theoretical instructions, the instructor shall orally quiz/question any or all students as of their understanding of the subject taught as needed.

During theoretical instructions, the students shall be tested at least twice during each of the subjects by a multiple choice written test. The tests is a progress test and a mandatory test. Passing rate for the test shall be 80% of correct answers.

A student not passing a mandatory test shall be given opportunity for additional training before retaking the test. In case a student fails three times in a subject, the HT/DHT shall decide further actions.

(B) Theoretical knowledge examinations.

Theoretical examination shall be done in accordance with the Authorities directives.

Before presenting the student to Theoretical Examination, the school shall perform a Mandatory Test so to satisfy itself of the competence of the student. Passing rate for the test shall be 80%.

(C) Area 100 KSA assessment;

Not applicable.

(iii) Authorization for test:

Authorization for skill test and theory examinations shall be done by HT or designee. Before authorization is granted for a theoretical knowledge examination, the student shall have attended all the theory, passed the progress tests and the mandatory test. Before authorization is granted for a skill test, the student shall have passed all theory tests and examinations, completed all the practical flying instructions and passed the check ride.

(iv) Rules concerning refresher training before retest;

If the student fails to achieve a passing grade in a test, a corrective action plan has to be given and student may only be entered for re-examination after corrective action plan has been completed.

(v) Test reports and records;

All tests shall be retained with the student's records. Any test reports and records shall be retained for a period of three years. All according to A:7 of this manual.

(vi) Procedures for examination paper preparation, type of questions and assessment, standard required for "pass";

All test is in either a paper or in digital form. All test have a passing rate of 80%. Test questions shall be "multiple choice", be relevant for the subject and at representable level.

(vii) Procedure for question analysis and review and for raising replacement papers; Questions shall be reviewed as necessary.

(viii) Examination re-sit procedures.

Should a student fail examination, an individual action plan with remedial training shall be provided outlining additional instruction to be given. The student may only be entered for re-examination after the corrective instruction has been completed.

A:10 Training effectiveness

(i) Individual responsibilities;

It is the responsibility of Head of Training that the training is performed to the highest of standards.

It is the Accountable Manager's responsibility that Head of Training has the necessary means to achieve his responsibility.

(ii) General assessment;

A follow-up on student performance shall be done during every lesson.

(iii) Liaison between departments;

All staff shall regularly gather to assess the effectiveness of the course, the progress in general and for individual students.

For any unsatisfactory progress shall be devised an action of remedy.

This gathering shall have the form of a conference.

The gathering shall be documented.

(iv) Identification of unsatisfactory progress (individual students);

Should a student show unsatisfactory progress, CFI or CTKI shall be informed.

Continued unsatisfactory progress shall be reported to HT.

(v) Actions to correct unsatisfactory progress;

CFI or CTKI shall confer with involved instructors and the student in question.

(vi) Procedure for changing instructors;

Any change of instructor shall be documented.

(vii) Maximum number of instructor changes per student;

Changing of instructor is not desirable. For a student to have more than two instructors is not desirable. (a)

In case of incompatibility between student and instructor, the student may on own request, if at all possible within the school, be offered a new instructor. The student may not on these grounds change instructor more than once. (b)

In case of the instructor being short term absent (example: sick), the lesson should be rescheduled. (c)

In case the instructor is expected to be long time absent, a new instructor to the student shall be assigned. (d)

Any change of instructor shall be documented. (e)

(viii) Internal feedback system for detecting training deficiencies;

Teachers and students are encouraged to report to HT any deficiencies.

(ix) Procedure for suspending a student from training;

AM may suspend or expel a student. If so, the proper authorities shall be informed.

(x) Discipline;

See OM A:4

(xi) Reporting and documentation.

Any documentation and reports shall be retained for a period of three years..

A:11 Standards and level of performance at various stages

(i) Individual responsibilities;

The instructors are responsible that the syllabus is followed.

Students are responsible to be fully prepared for a lesson.

(ii) Standardization;

See OM D:4.

(iii) Standardization requirements and procedures;

Flight procedures and theoretical knowledge – A comprehensive knowledge to support decision-making.

(iv) Application of test criteria.

On every Progress Test, the students shall be graded “Pass” or “Repetition needed”.

The instructor shall justify the grading.

A student that has not achieve the grade “Pass” shall receive corrective training so to pass before continuing with any lesson which requires the knowledge in the failed subject. Should a student fail to achieve a passing grade three times in any lesson, the Head of Training shall be informed so to decide further actions.

PART B Briefing and Air Exercises

B:1 Air exercise

42		All		Check before Skill Test	01:3	

Minimum Hours Required:

45 hrs total time, whereof minimum 25 hrs Dual and 10 hrs Solo instruction.

A maximum of 5 hours may be done in FSTD

B:3 Course structure: phase of training:

Instruction shall follow syllabus as far as practical.

Syllabus is based on a minimum time and lessons required. The HT/CFI may extend the time and/or number of lessons required to reach proficiency.

All in accordance with appendix A1 of this manual.

Applicants for a PPL(A) shall have completed at least 45 hours of flight instruction in airplanes, 5 of which may have been completed in an FSTD, including at least:

35 of dual flight instruction; and

10:00 of supervised solo flight time, including at least 5 hours of solo cross-country flight time with at least 1 cross-country flight of at least 270 km (150 NM), during which full stop landings at 2 aerodromes different from the aerodrome of departure shall be made.

The practical flying training is divided in 3 phases:

1-First solo preparation, lesson 1-13

2-First long solo navigation preparation, lesson 14-34

3-Precision and skill test preparation, lesson 35-42

A progress check is done twice per course as far as is practical. The progress check is to be recorded in course documentation in Flightlogger under “Progress test Phase 1” and “Progress test Phase 2” and completed by HT, CFI or designee. The progress check is to evaluate the overall performance of the student.

Emergency drills are incorporated in every lesson.

Lessons are to be repeated until passed.

B:4 Course structure: integration of syllabi

This course will, as far as practical, integrate both the theory and the practical flying in a suitable way. The FSTD training will be integrated as part of the flight training.

B:5 Student Progress

The student progress should follow the structure of this course. Students should receive the required knowledge in both theory and flying throughout the course.

The student progress is noted on every flight. Before a flight lesson the student is briefed on what he/she is expected to be able to do and the standard of proficiency the student must achieve. The standard of proficiency varies depending on the lesson, and all can be found in appendix A2 of this manual.

Should the student not progress to the satisfaction of the instructor or show an unsatisfactory evaluation at an end of phase progress check, HT shall be informed.

Student shall not be released for First Solo (lesson 14) before completing all exercises and passing the progress check for phase 1.

Student shall not progress to Solo Pilot Cross Country Navigation (lesson 35) before completing all exercises and passing the progress check for phase 2.

Student shall have completed all lessons and passed all progress checks before being presented for Skill Test.

B:6 Instructional methods

This syllabus has different instructional methods depending on the lesson held. Flight instructions use pre- and post-flight briefings to provide the required understanding and knowledge of the lesson, which adhere to the syllabi, and the training specifications.

The instruction given should be relevant to the lesson details.

Theory instructions use lecture style teaching and use appropriate instructional aids.

B:7 Progress check

A Progress check should be performed by HT/CFI or designee on the last flight of each phase.

During the progress check the overall performance of the student shall be evaluated.

Should a student fail a progress check 3 times, HT shall be informed.

B:8 Glossary of terms

See “0:6 Abbreviations” in this manual.

B:9 Appendices

(i) Progress test report form

Not applicable.

(ii) Skill test report form

Not applicable.

(iii) ATO certificates of experience, competence, etc.

Will be provided upon request.

PART C FLIGHT SIMULATION TRAINING DEVICE (FSTD)

A FNPT may be used for flight training for:

- Flight by reference solely to instruments; —
- Navigation using radio navigation aids; —
- Basic instrument flight. —

The use of the FNPT should be subject to the following:

- The training should be complemented by exercises on an airplane; —
- The record of the parameters of the flight must be available; and —
- A FI(A) or STI(A) shall conduct the instruction. —

C:1 Air exercise

See Appendix A1:

- Training record for PPL
- and

Appendix A2

- Training lesson details

C:2 Air exercise reference list

See B:2 above.

C:3 Course structure: phase of training:

See B:3 above.

C:4 Course structure: integration of syllabi

See B:4 above.

C:5 Student Progress

See B:5 above.

C:6 Instructional methods

See B:6 above.

C:7 Progress check

Not applicable.

C:8 Glossary of terms

See “0:6 Abbreviations” in this manual.

PART D Theoretical Knowledge Instructions

D:1 Structure of theoretical knowledge course

See Appendix B1 and Appendix B2.

The theory is divided into blocks. The theoretical course is designed to be held during one or two days during scheduled weekends.

At the end of each block students should be presented with tests and theory examinations.

There are totaling 100 hours of instructor led lessons.

The number of hours is for guiding the instructor only and may be modified so to suit the needs and ability of the students.

In case of a major deviation, the CTKI shall be informed.

D:2 Lesson plans

A description of each lesson is presented in Appendix B. Appendix B describes each lesson, including teaching materials, training aids.

Appendix B1 – Training Syllabus for PPL

Appendix B2 – Student progress

D:3 Teaching Materials

Standard classroom with whiteboard and required technical aids.

Recommended Manuals, Electronic Books, Multimedia and Exam preparation material

See Appendix B:2

D:4 Student progress

The student progress should follow the structure of this course. Students should receive the required theory knowledge throughout the course.

All students can be orally quizzed or questioned during instruction, so to demonstrate understanding of the subject.

The student progress is noted on every lesson.

Should the student not progress to the satisfaction of the instructor, CTKI shall be informed.

CTKI shall inform HT/DHT if a student fails a mandatory test.

There shall be one progress tests and one mandatory test per subject.

Passing rate for a test is 80%.

Before a student is presented to a theoretical knowledge examination, the student must have attended all the theory lessons, passed progress and mandatory tests.

D:5 Progress testing

Progress tests are to be completed at the end of each theory block. Progress tests are in either a paper or in digital form. Test questions shall be "multiple choice", be relevant for the subject and shall demonstrate adequate knowledge of their subject. All the progress tests shall be recorded and saved in the student folder. The passing rate is 80%.

D:6 Review procedures

The course shall be reviewed as needed.

Should a student fail a mandatory test the TKI shall inform the CTKI.

Should the student fail the mandatory test 3 times in a subject, HT/ DHT shall be informed.

If the student fails to achieve passing grades in a MT, a new corrective action plan has to be given. The student may only be entered for another test after adequate corrective instructions has been followed.

If applicable an individual action plan with remedial training will be provided. The student may only be entered for re-examination after the corrective instructions has been meet.
